EXAMINER'S AMENDMENT

1. The following amendment is made to increase comprehension of the invention, and does not affect/change the original language:

1. (Amended) A suspension device for disposition between a support post of a bicycle and a suspended member, including a bicycle seat and bicycle handlebars, the device comprising

an invertible connector body having a support post mounting, a horizontal median, and two shoulder surfaces disposed in a position selected from the group consisting of: [[above the median; and below the median, the connector body having two sleeves;]] above the median, and below the median;

the connector body having two sleeves;

two slide pins slidably mounted in, and passing through said two sleeves;

a top bracket, and a bottom bracket, fixed to top and bottom ends of said brackets;

two springs disposed between said shoulder surfaces, and one of said brackets; and,

a suspended member mounting connected to the top bracket.

2. **Claims 1-16 are allowable** because prior art does not disclose the invention described above.

3. The prior art found pertinent to the disclosure, but not relied upon, includes:
